

# BULLSEYE™ ULTRA-DURABLE LABELS

Bullseye™ labels are custom-engineered warehouse labels tough enough for your toughest environment.

Tired of replacing warehouse rack labels damaged by skids and forklifts? Are scratched and torn labels failing to scan and slowing down picking operations? Do you have bulk storage areas where overhead signage isn't an option? If the answer is yes, the solution is BullsEye™ — our toughest, most durable warehouse location label.

## Go Ahead. BullsEye™ Can Take It.

No matter how efficient and automated your inventory systems, it's no match for poorly made barcode labels that easily scratch and tear. When labels won't scan, workers are forced to enter data manually, which hinders productivity and can lead to costly errors. BullsEye™ ultra-durable labels are custom-engineered for today's modern warehouse. Our specialized manufacturing process produces extremely rigid and durable labels that withstand daily encounters with forklift trucks, pallet skids, carts and just about anything else you can throw at them.

## Multiple Uses Throughout Your Facility

Because BullsEye labels are durable and rigid, there's no need for an add-on placard, magnet or sign - which means great return on your investment. BullsEye labels are ideal for use with:

- Warehouse beams and shelves
- Upright racking
- Floor location markers

Preprinted LPN Labels | Rack Labels  
Warehouse Signs | National Installation Services

BullsEye™ ultra-durable labels are extremely rigid and durable to withstand daily encounters with forklift trucks, pallet skids and warehouse traffic.
